

Software Developer, Back End

Montréal, QC, Canada

www.successfinder.com

We are looking for a passionate software developer with experience to join our development team. The candidate will participate to the development of our product within an experienced team in an enriching and collaborative work culture.

YOUR RESPONSIBILITIES:

- Design, develop, test, deploy, maintain and improve our cloud platform.
- Support and extend our REST APIs and other server components.
- Analyze and participate to the design of new features.
- Integrate our cloud platform to 3rd party web services.
- Adjust, adapt and grow our database.
- Manage individual project priorities, deadlines and deliverables.

WHAT YOU WILL ENJOY:

- Development of cutting edge technology.
- Competitive compensation.
- Growth and development opportunities.

OUR REQUIREMENTS:

- BA/BS degree in Computer Science or equivalent technical experience.
- 2 - 5 years of professional software development experience within a team.
- Experience with the programming language: Python & MySQL.
- Experience working with Relational and NoSQL database.
- Experience with the latest and greatest web standards: HTTP, REST and JSON.
- Positive attitude.
- Great communicator who loves to work and interact with teammates.
- Strong detail orientation, ability to set priorities, manage his/her time, multitask and meet deadlines.
- Ability to quickly learn and accurately administer complex processes.
- Strong ability to track actions and follow through on processes.
- Proven ability to work effectively in a fast-paced and constantly changing environment.
- Excellent problem solving skills, including the ability to problem solve without direct supervision.
- High responsiveness to urgencies.

If you fit this profile, please send your resume to info@successfinder.com.

Only those pre-selected will be contacted.
